-

PROJECTS

AI-Based Smart Placement Cell Management System | Final Year Academic Project :

- Built a full-stack placement management web application using React.js, FastAPI, and MongoDB.
- Implemented student registration, placement drive management, application tracking, and secure authentication.
- Integrated an AI assistant for placement guidance and career support.
- Developed responsive dashboards for students and placement officers.

Personal Portfolio Website :

- Built a personal portfolio website to display my skills, education, and projects.
 - Developed the website using React.js, JavaScript, and Tailwind CSS.
 - Created responsive pages for About, Skills, Projects, and Contact sections.
 - Added simple animations, hover effects, and mobile-friendly design.
 - Used ChatGPT and Antigravity IDE for development support and debugging.
-

CERTIFICATION

- Python Full Stack Development – QSpiders
